The competitions will take place on the **Noce river** in Mezzana regarding the SPRINT, the SLALOM and the H2H. The DOWNRIVER will start in Ossana and finish in Caldes. Noce river is a continuous, technical, natural mountain river; it is 30 km long and the grade varies from 2 to 5, with many sections (run by the races) having a 3+, 4 grade. There are different terrain typologies the river runs through: Mezzana-Marilleva and Croviana – Malé section: open fields, other sections: steep sided terrain and forests. The flow of this river is

nearly constant and its usual limits are normally about 20 to 30 cubic meters/sec. The water level depends on 2 hydroelectric basins. The subject responsible for the water level regulation and water release is the ENEL –hydroelectric plant of Cogolo, in Val di Peio, which guarantees for a constant water level for an event of such an importance.
